

# The Professional Learning Partner Guide

Find the perfect fit for your professional learning journey.

The Professional Learning Partner Guide (PLPG) is a free, easy-to-use tool that helps education leaders find certified professional learning partners with expertise in their curriculum. With just a few clicks, you can search by curriculum, service type, and location to discover partners whose skills align with your needs.

**Partners are rigorously vetted** and must demonstrate expertise not only in specific high-quality instructional materials (HQIM) but also in innovative, proven best practices for effective professional learning.

**Curriculum-based professional learning (CBPL) is uniquely powerful**, connecting content knowledge and instructional strategies directly to the materials teachers rely on daily.

By selecting a PLPG-certified partner, you eliminate the guesswork and gain a trusted expert who knows how to maximize the impact of your curriculum and **improve outcomes for teachers and students alike.**

## How Are Partners Selected for the Guide?

Inclusion in the PLPG means the partner has passed a three-step evaluation process. Expert reviewers evaluate the materials against the PLPG's Application Rubric to assess if the organization provides significant evidence of robust, HQIM-aligned professional learning services. All PLPG-certified organizations have passed three gateways:

1. Content and HQIM Expertise
2. Quality of Professional Learning Design
3. Using Data to Plan and Improve

### How Often Are Partners Added?

The PLPG opens applications twice a year. New partners can become certified, and existing partners can update their services to reflect new capabilities.

### Is the Guide Free?

Yes, the PLPG is completely free to use—no subscriptions or memberships required. Custom state-specific guides are available for a fee.

“The guide helped us find a partner who knew our curriculum and challenges. They've reignited our excitement for the materials and their impact on student learning.”
